

YOUR VISION DESERVES **LIMESTONE**

Architecture is about ideas, ideas that come to life through trends, the use of materials, and new technologies. Since 1926, we've seen numerous trends in the limestone industry and have helped thousands of architects reach their vision.

Walter E. Washington Convention Center
(Washington, DC)

The Washington Convention Center and its design team received the Urban Land Institute (ULI) and American Institute of Architects (AIA) awards for the most successful urban development project in 2006.

Mandarin Oriental
(Boston, MA)

Indiana Limestone worked well as both a technical and aesthetic choice for this stunning hotel. Three different types of stones were utilized and color, fit, and design all had to work in harmony.

Simon Hall (Bloomington, IN)

Simon Hall won the 2008 R&D Magazine "Lab of the Year," an architectural competition for research facilities.

Yankee Stadium (New York, NY)

A total of 10,823 pieces amounted to 72,000 square feet of Indiana Limestone on the precast facade of this beloved ballpark, including the V-cut letters in the limestone at each entrance.
